## AREA OF INTEREST

- Fullstack Web Developer
- Youtube Enthusiast
- Gaming

## ABOUT

I am a dedicated information technology student seeking opportunities to apply my skills and knowledge. Proficient in programming language C++, Javascript. Experienced in web development, and problem-solving. Committed to staying updated with the latest technologies and Eager to contribute to innovative projects and continuously expand my technical expertise.

## PROJECT

- **Code Share : Realtime Code Sharing Editor**

Implemented "Code Share", an innovative real-time synchronized platform for collaborative code sharing using React.js, Tailwind CSS and Socket.IO. This application enables productive, real-time collaborative coding sessions, streamlining coding rounds which enhances productivity with multiple theme selection option

- **BlogSpire**

Designed and developed a robust full-stack blog app using React.js, Tailwind CSS, MongoDB, Express and Node.js. Implemented essential features like user authentication using JWT and blog management like add, delete and update blog. Committed to creating secure, user-friendly, responsive and efficient web applications for blogger's growth and idea sharing.

- **E - Cart**

Built a fully responsive E-Cart website with React.js and styled components, ensuring user-friendly design and seamless navigation. key features include user authentication and cart functionality. Incorporated sorting filters for products based on price, company, category, color and rating. Currently working on backend development to enhance functionality and optimize performance

## SKILLS

- C++
- Object Oriented Programming
- Operating System
- Problem Solving
